

**PLANNING COMMISSION**  
201 French's Alley; Senatobia, MS 38668  
662-562-5733

## BUILDING PERMIT PROCEDURES

1. All applications are applied for online now at [MGOconnect.org](http://MGOconnect.org). Please read all the instructions below before applying and read all online instructions to set up your New Customer Account. The help number for this site is 985-851-0760 and they are very helpful if you need it.
2. Upon approval of the site and an application issued for the building permit, our office will issue you an E911 Address, if needed.
3. The applicant will need to contact the Mississippi Wastewater Department for the well and septic permit. Their phone number is 1-855-220-0192 or you can go online and fill out the application at <http://healthymms.com/wwapply> to apply and you will have to include your deed and survey or aerial view to that department through an email and pay for their application. They will then proceed to visit your site to determine the sewer and water requirements and send you their determination through an email. After you have your well and septic installed, your installer will submit his paperwork to them, and they will return for their final inspection. The company installing your septic is responsible for contacting the Wastewater Department to schedule their final visit.

Note: PLEASE, if you are in a **Water District**, contact them to begin their process now, instead of later in your building process, to get water to your home. *If you wait, you may be delayed weeks from getting into your home due to their timeline.*

4. PLEASE place readable signage close beside your drive with your Address and Permit Number displayed for inspectors and all deliveries.
5. PLEASE contact the Tate County Road Manger to have your driveway evaluated for the size of the culvert you will need to place if a new driveway is being installed. The number is 662-562-4647 and wait for the Road Manager extension.
6. Progress inspections required by the 2006 International Residential Code will be as follows on the next page and are requested online.
7. Once all inspections have been made and approved, the mechanical, electrical, and plumbing permits are pulled for your building; and the Wastewater FINAL approval letter is received, then the Certificate of occupancy will be issued.

---

Minimum Lot Requirements:	Community Water	1.0 Acre
Without Community Water in:	Zones AR1, R1, R2, C1, CC & M1	1.5 Acres
